

ABDULLAH AYYAZ

MOBILE APPLICATION DEVELOPER (FLUTTER)

03086533433

abdullah ayyaz

abdullahayyaz.dev@gmail.com

Computer Science student with practical experience in building cross-platform mobile applications using Flutter and Firebase. Skilled in integrating backend services and managing databases like MySQL, Firestore and MS SQL Server. Eager to contribute to dynamic mobile development teams and grow as a developer by solving real-world user challenges.

EDUCATION

2021 - 2025

Government College
University, Lahore

CGPA - 3.06/4

Bachelor of Science in Computer Science (BSCS)

- Programming Fundamentals
- Object Oriented Programming
- Data Structures and Algorithms
- Database Management System
- Machine learning / Artificial Intelligence
- Mobile Application Development

EXPERIENCE

ServiceHub (Marketplace)

Final Year Project

- ServiceHub is a cross-platform service marketplace application built with Flutter. It connects users with a variety of home, lifestyle, event, and personal care services, and features integrated machine learning for price prediction and a chatbot for user support. The backend leverages Firebase for authentication, storage, and real-time data through Firestore, and includes Python-based ML microservices.
- State management through GetX, Integrated Google Maps

Cricinsights (Live Cricket Updates)

6th Semester Project

- Utilized Stateful and Stateless widgets
- handle API calls and parse JSON responses to fetch live data
- Build responsive and interactive UIs using FutureBuilder

Shoe Shopping Management System (DBMS)

4th Semester Project

- Designed and developed a complete DBMS for a retail shoe store using MS SQL Server.
- Created Entity Relationship Diagrams (ERDs) to model data flow and relationships.
- Developed normalized tables to reduce data redundancy and ensure data integrity across the database.
- Wrote complex SQL queries for CRUD operations, data retrieval, order tracking, and sales reports.

SKILLS

Languages:

Dart, Python, Java, C/C++, Html, CSS, JavaScript, SQL

Tools / Framework:

Flutter, Firebase, VS Code, Android Studio, MySQL, MS SQL Server, Git & GitHub,
