OBJECTIVE

Detail-oriented and methodical **Senior Software Test Engineer** with 6 years of experience in manual and automated testing. Proficient in designing and executing test cases, defect tracking, API testing, and ensuring end-to-end software quality. Hands-on experience in fintech, blockchain, and SaaS-based environments. Adept at working in Agile/Scrum teams and communicating effectively across technical and non-technical stakeholders.

EXPERIENCE

Senior Software Test Engineer

Big Immersive

Nov 2022 to Present

- Designed and maintained **master test plans** for end-to-end testing, including scope, objectives, test deliverables, resources, schedule, entry/exit criteria, and risk mitigation strategies.
 - Developed comprehensive **test cases** based on user stories, acceptance criteria, and design documentation.
 - Utilized **Selenium WebDriver with Java/Python** and BDD frameworks to implement automation scripts for regression and smoke tests.
 - Created and maintained a **Requirement Traceability Matrix (RTM)** to ensure all functional and non-functional requirements were tested.
 - Conducted **manual QA testing** across black box, regression, sanity, smoke, performance, and stress scenarios.
 - Managed and reported **defects and progress** using JIRA, and coordinated with developers and product teams to resolve issues.
 - Blockchain Testing:**
 - Validated smart contract transactions (minting, vesting, burning, referrals) blockchain.
 - Verified NFT lifecycle and ownership through blockchain explorers.
 - Simulated wallet interactions and token transfers for various user roles (admin, referrer, end user).
 - Ensured compliance with multi-sig functionalities and contract restrictions.
 - Participated in product design reviews to provide QA input and risk assessments early in the SDLC.
 - Provided **daily QA status reports** to management and contributed to release sign-off processes.
-

Software Test Engineer

i2c Inc.

May 2022 to Nov 2022

- Worked in a **fintech domain**, focusing on digital payment solutions, transaction processing, and integration with global financial systems.
 - Designed automated test scripts using **Selenium (Python)** to enhance testing efficiency and reduce manual effort.
 - Performed comprehensive **API automation and validation** using **Postman**, ensuring secure and reliable service communication.
 - Involved in **OLTP (Online Transaction Processing)** testing and collaborated with high-profile clients such as **VISA and MasterCard**.
 - Coordinated **UAT**, test planning, and execution with **onshore and offshore QA teams**, ensuring timely and quality releases.
 - Maintained structured and traceable **testing documentation** using **JIRA and Confluence**, including test plans, bug reports, and requirement mappings.
-

Software Test Engineer

Coeus Solutions GmbH

July 2019 to Apr 2022

- Conducted manual QA for **Web and Mobile applications** (iOS & Android) in **NFT and eCommerce domains**, ensuring smooth functionality and bug-free releases.
 - Validated **REST APIs** with both positive and negative test scenarios to ensure secure and consistent data exchange.
 - Reported and tracked bugs using **JIRA and Trello**, actively participated in **Agile ceremonies** including daily standups, sprint planning, and retrospectives.
 - Created and maintained **structured test plans, detailed test cases**, and test reports aligned with project requirements.
 - Executed **cross-browser and responsive testing** to verify UI/UX consistency across platforms and devices.
 - Reviewed business requirements and functional specs, suggesting enhancements for improved product stability and user experience.
-

Technical Skills

- **Testing Tools:** Selenium, Postman, JIRA, TestRail, Confluence, Trello, JMeter
 - **Testing Types:** Manual QA, API Testing, Load/Stress Testing, Smoke/Sanity, Regression, Black Box
 - **Programming/Scripting:** Java, Python, SQL
 - **Development Practices:** Agile, Scrum, SDLC, STLC, BDD
 - **Documentation:** RTM, Test Plans, User Manuals, Release Notes
 - **Others:** Client Communication, Risk Management, Performance Testing, Cross-Browser Testing
-

EDUCATION

Bachelor of Computer Science

Punjab University College of Information Technology (PUCIT), Lahore

Graduated: July 2019

LEADERSHIP & ACTIVITIES

- Ex-President – PUCIT Blood Donor Society
- Ex-Assistant Director Education – SEEK NPO
- Ex-Assistant General Secretary – PUCIT Sports Society
