Education

PUNJAB UNIVERSITY COLLEGE OF INFORMATION TECHNOLOGY (PUCIT)

Lahore, Pakistan

Bachelors of Computer Science

2021-Present

Professional Experience

ML/AI Intern (DEVSINC)

Dec 2024 – Feb 2025

- *Open-AI & LLM Integration*: Developed AI-powered applications leveraging Open-AI's GPT models, improving chat-bot response accuracy and reducing processing time.
- *Natural Language Processing (NLP)*: Implemented NLP techniques, achieving accuracy in NER and precision using spaCy, NLTK, and transformer models.

Full-Stack AI-Intern (WIZMEN SYSTEMS)

June 2024 –Aug 2024

- *Frontend AI Development*: Utilized React to develop interfaces for ERP solutions, improving UI responsiveness and also implemented forms and chat-bot integral to the ERP system.
- *Backend Integration*: Successfully integrated multiple databases, including MongoDB and MySQL, into backend systems, optimizing query performance.

Academic Projects

Pocket Doc (FYP)

- Designed a Final Year Project focused on quantized LLaMA models for efficient text summarization and quiz generation on low-resource devices.
- Ensuring 2x faster processing with minimal performance trade-offs, retaining capabilities of LLaMA. It provides students and professionals with AI-generated summaries and quizzes.

NLP CV-Parser

- Enhancing recruitment, this NLP-based CV parser automates profiling with 85% accuracy, extracting skills, education, GPA, and company names from CVs. It processes hundreds of CVs in minutes.
- Streamlining data extraction, it ensures accuracy in classification. Using an SVM model and a pre-trained spaCy pipeline, it accurately predicts CV categories and key details

Docs QA Bot

- AI powered document assistant that enables users to chat with their pdfs , retrieving key information instantly using Retrieval Augmented Generation (RAG).
- Built with Lang-Chain, Google Gemini API and FAISS , it processes and indexes documents efficiently, providing accurate responses in seconds through interactive Streamlit UI.

Extracurricular & Volunteer Experience

EMS (Event Management Society)

Sep 2024 –Present

- As President of EMS Organized all the big events and managed a team of 55-60 people and handled all the on-point problems in events like JOB-FAIR and increasing the success of events by 70%.
- Led the successful organization of university seminars, workshops, and networking events, ensuring seamless coordination between speakers, sponsors, and attendees.

AMAL Academy (Stanford Funded program)

Mar 2024 –June 2024

- Completed an intensive 3-month Fellowship funded by Stanford University from 4500 applicants
- Invested 150 hours in order to develop business skills (communication, leadership, problem solving)

Technical Skills

- *Language*: Python, Pandas, NumPy, TensorFlow, spaCy, NLTK, Scikit-learn ,C++, JS, JAVA, MySQL
- *Frameworks*: Langchain , RAG , Streamlit, React JS , Node JS ,Express JS , Tailwind CSS,
- *Developer Tools*: Google Colab, VS Code, Git, OpenAI, LangChain, Hugging Face, Jupyter Notebook
