Professional Summary

Passionate and adaptable IT learner with hands-on experience building responsive, user-centered interfaces. While I explored mobile development and built a cross-platform app, I found my interest aligned more with web technologies. Currently focused on frontend development, with openness to backend roles in the future. Thrive in collaborative environments and committed to continuous learning and evolving best practices.

Education

2022–2026 **Bachelor of Science in Information Technology**, *Bahria University Lahore Campus*
GPA: 3.63 (5th Semester), CGPA: 3.1 (Up to 5th Semester)
Completed 6th Semester – Result Awaited
Relevant Coursework: Data Structures, OOP, DBMS, Web Development

Technical Skills

Programming Languages	C++, JavaScript, Dart, SQL
Web Development	HTML, CSS, JavaScript, Bootstrap, React (basic), PHP (basic)
Mobile Development	Flutter (explored), Dart — not primary focus
Tools & Tech	Git, GitHub, VS Code, Android Studio, Firebase
Concepts	OOP, DBMS, Responsive Design, Agile (Scrum)

Academic Projects

Hospital Management System (C++)

- Developed console-based system for patient record management
- Implemented file handling for data persistence with CRUD operations
- Features: Patient registration (Emergency/OPD), search by ID, edit/delete records

TravelEase – Travel Booking Website (HTML, CSS, JavaScript, PHP)

- Designed responsive website for destination exploration and bookings
- Implemented user authentication and cab booking system with fare calculation
- Used PHP for backend form handling and data processing

AI Buddy – Educational Chatbot App (Flutter, Dart, Firebase)

- Built during mobile development learning phase
- Developed Flutter-based chatbot with MCQ tests and book search functionality
- Integrated Firebase for user authentication and data storage
- Implemented Provider for state management

Vehicle Management System (C++)

- Designed OOP-based system using inheritance and polymorphism
- Implemented exception handling and menu-driven interface
- Demonstrated clean code architecture principles

Additional Projects

Student Registration System (PHP, MySQL): Web-based CRUD application with Bootstrap

Personal Portfolio Website (HTML, CSS, JS): Responsive design with interactive elements

Doctor Appointment System (C++): Data structures implementation with time management

Interests

Frontend Development (**Primary Focus**)

Open to Backend Development in the Future
