- Visual Studio
- MySQL

PROJECTS

Library Management System (C++)

Developed a console-based system to manage books, user records, and transactions in a library environment.

Online Bill Generator (C++)

Created a console-based application to generate utility bills (internet, electricity, water, etc.). Designed to take user input and calculate total charges based on usage and rates.

Lost and Found ID Card Data Base (MySQL)

Designed a database system to store and manage lost and found student ID cards. Enabled efficient record keeping and search functionality for recovered items.
