

HASSAAN ZAKRIA

Lahore, Pakistan | (+92) 3134038724 | hassaanzakria1@gmail.com | linkedin.com/in/hassaan-zakria

PROFESSION SUMMARY

Dedicated and detail-oriented data science professional with a strong foundation in statistical analysis, machine learning, and data visualization. Proficient in Python, SQL, and key data science libraries with hands-on experience in building predictive models and solving real-world problems through data. Passionate about transforming complex datasets into actionable insights and committed to continuous learning and innovation in the field of AI and analytics.

EDUCATION

B.Sc. in Data Science - University of Management & Technology - Lahore, Pakistan

2021-2025

Relevant Coursework: Machine Learning, Deep Learning, Artificial Intelligence, Database, Advance Statistics, Data mining, Data Visualization, Data Warehousing, Big Data Analytics.

EXPERIENCE

Data Science Internship - CongoRise InfoTech (Remote)

Aug 2024–Sep 2024

- Completed a remote Data Science internship, working on projects such as Iris Flower Classification, Credit Card Fraud Detection and Fake News Prediction.
- Applied machine learning techniques for accurate results.
- Developed skills in data preprocessing, model training, and evaluation using Python and key ML libraries.

PROJECTS

CATA CHATBOT

- Developed a generative AI-powered therapist chatbot that provides personalized pre-counseling responses based on real-time emotion detection.
- The system integrates the Deep Face model for facial emotion recognition and the Speech Brain model for analyzing voice tone to assess the user's emotional state.
- Based on these inputs, the GPT-4 API is used to generate empathetic and context-aware responses tailored to the user's needs.

FOREST FIRE PREDICTION

- Developed a machine learning model to predict the likelihood of forest fires based on environmental factors such as temperature, humidity, and wind speed.
- Utilized classification algorithms to identify high-risk zones and aid in proactive disaster management.

LAHORE HOUSING PRICES PREDICTION

- Developed a regression model to predict housing prices in Lahore, solving the challenge of inaccurate pricing.
- Achieved accuracy score of 87% by analyzing features like location and size, enabling data-driven insights for real estate stakeholders.

TECHNICAL SKILLS

- Languages:** Python, MySQL, C++, HTML, CSS, JS.
- Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Plotly, Scikit-learn, Keras, Tensorflow, Scipy, Lang Chain, PyTorch, Streamlit.
- Tools:** Power Bi, Tableau, Weka, Hugging Face, AWS, MS Office, Canva.
- Soft Skills:** Teamwork, Adaptability, Problem-solving, Leadership, Collaboration, Creativity, Critical Thinking, Active Listening.

CERTIFICATIONS

- Generated AI for Everyone – Coursera Feb 2025
- Google UX Design Professional Certificate – Coursera Nov 2024
- Google Data Analytics Specialization – Coursera Sep 2024
- Web Design for Everybody Specialization – Coursera Sep 2023
- Machine Learning Specialization – Coursera Aug 2023
- Databases and SQL for Data Science with Python – Coursera Jul 2023
