WORK EXPERIENCE

Senior Backend Developer - Veeva (Contract Based Remote job at UK) (Mar 2024 - Today)

Hired as a Senior Backend Developer:

- Developed middlewares to sanitize requests, validate data, and handle authorization for secure processing of form inputs and requests.
- Integrated and Synced products from Vault CRM to store using backend app via GraphQL APIs, enhancing data accuracy and efficiency.
- Used Webhooks for the order creation and payment syncing with the CRM system, eliminating 100% of manual data entry.
- Achieved 90% code coverage with PHPUnit test cases, ensuring robust and reliable features.
- Developed Shopify Function APIs to create tiered discounts based on quantity in shopify store.
- Engineered backend APIs in line with CRM business logic.
- Worked with React and Liquid theme files as frontend technologies.

Senior Software Engineer - CreativePixel360 (Nov 2023 - Mar 2024)

Hired as a Senior Software Developer for Magento, Laravel, and Wordpress:

- Upgraded three PHP sites to the latest versions, improving security and performance and ensuring the compatibility of third-party extensions.
- Worked on two projects based on Alpine.js and Tailwind CSS
- Developed custom extensions for the customer product reviews feature((Hyvä-compatible) and an extension related to the orders and their delivery-date management
- Synced two sites to use the same catalog via data center.
- Worked on the performance scores for two sites.

Software Engineer - Rolustech (Sep 2021 - Nov 2023)

Performed as a Senior full Stack Developer for Node and Magento:

- Migrated the Magento site from version 2.2 to 2.4.5, handling over 1.2 million catalog items. Focused on queries profiling and database design.
- Optimized search functionality using the GraphQL API and Elasticsearch, and used an adapter as a mediator between Magento and Elasticsearch, resulting in a 60% to 70% reduction in the average response time and a better user experience.
- Synchronized and integrated multiple third-party services, such as Stripe payment gateway, FedEx for shipments, and QuickBooks Online for accounts and finance, using REST APIs.
- Engineered custom features and functionalities for B2B operations and contributed to database design and modeling.
- Integrated the SMTP protocol to send emails and converted Figma designs into web interfaces, email templates, and PDFs.
- Built a Model-View-Controller architecture from scratch and an Object-Relational Mapping pattern in Node with Cypress and qUnit testing. Developed APIs using Express, Node.js, and MongoDB.
- Created and designed custom themes for two magento e-Commerce websites.
- Wrote back-end scripts for data fixes and to perform mass actions using CSV.
- Synchronized a site site with a CRM system using APIs and constructed APIs to align a mobile application with the site.

SKILLS

Programming Languages, Frameworks, and Libraries: Javascript, NodeJs, PHP, React, Python, Magento, also familiar with Android Studio, Django, Vue js, and Ruby on Rails

Other Skills: Design Patterns, Debugging(xdebug), APIs Development, Web Development, Docker, Apache Server, Git, CI/CD Pipelines, Plesk, Cypress, Responsive designing, Backend Scripts, JQuery, Cronjobs, Html, CSS, SQL, MySql, and Unit Testing(PHPunit, QUnit)
