A Computer Science graduate with a passion for solving real-world problems through code efficiently. I've worked on several projects involving AI, Python automation, Data Science, and web development — including building a real-time crowd behaviour detection system using YOLOv8. I enjoy turning ideas into practical solutions, especially in areas like AI, computer vision, and full-stack development. I'm currently sharpening my skills in the MERN stack while continuing to explore the power of machine learning with Python.

Always open to learning something new, collaborating on meaningful tech, and contributing to projects that have real impact.

Projects

- Developed a Crowd Behaviour Analysis System using Python, Streamlit, OpenCV, and YOLOv8. Trained custom models to detect placards, guns, knives, and fighting behaviour in images, videos, and live feeds with reliable accuracy.
- Developed Systems For predicting House Prices, a system that tells Heart diseases average in different age groups using Machine Learning Models
- Integrated Signup/Sign-in, Deposit, and Withdrawal functionality into an existing MERN stack-based banking application using ChatGPT for development guidance.
- Built a text-based Clothing Inventory and Billing System in C++, applying OOP principles, user authentication, and file handling for inventory management.
- Created a Contact Management System in C++, implementing OOP and DSA concepts, with searchable contact records by name and number using file storage.
- Designed a Hospital Database in MySQL Workbench, developed SQL queries, conducted a case study, and created an Entity-Relationship (ER) diagram.
- Developed a fully responsive Gym website front-end using HTML, CSS, JavaScript, and Bootstrap with a clean and mobile-friendly layout.

EDUCATION

Lahore Garrison University - BSCS (Completed)

2021 - 2025

TECHNICAL SKILLS

- Data Science
- Machine Learning
- AI Model Training
- Python
- MERN Stack
- C++, C
- HTML, CSS, JavaScript, Bootstrap

SOFT SKILLS

- Problem Solving
- Team Work
- Active Listening
- Microsoft Word / PowerPoint
- Efficient use of AI Chatbots

TRAININGS AND CERTIFICATIONS

Corvit | Artificial Intelligence

June 2025 - Continued

NAVTTTC and Huawei Exam Evaluation for certification.

EVS Training Institute | Front-End Web Development

April - November 2021

- Learned HTML, CSS, JavaScript, Bootstrap advance my skills in them
- Developed a news channel basic home about and contact page
- Developed a Responsive Gym Website

Punjab Group of Colleges | Microsoft Specialist

2019

Participated and scored 96% in Microsoft Office Specialist (MOS) Exam sponsored by PGC
