

A Software Engineer with 3+ years of experience who possesses extensive engineering knowledge and an enthusiasm for solving problems. A track record of delivering effective engineering solutions for various projects. I have been a valuable and dedicated team member over this time, demonstrating my capacity to work under pressure to meet company objectives.

EDUCATION

BS Software Engineer
University of Gujrat

2016 - 2020

SKILLS

- Php / Laravel / HTML / CSS / Javascript / Bootstrap / NodeJS
- Restful apis / Third-party APIs integration / Payment gateways / Stripe Integration
- MySQL / PostgreSQL / SQL / MongoDB
- AWS / EC2 / RDS / S3 bucket
- Trello / Jira / Bitbucket / Github / VS Code

EXPERIENCE

Senarios
Software Engineer

July 2022 - Present

- Strong expertise in development using frameworks like Laravel.
- Experienced in integrating third-party APIs, popular payment gateways like Stripe into e-commerce and web applications.
- Proficient in version control systems like, Git, GitHub, and GitLab for collaborative development and version management.
- Capable of utilizing AWS services like E2C, S3.
- Experienced in utilizing project management tools like Jira, Trello, or Bitbucket for agile project planning, task tracking, and collaboration.
- Proficient in working with both relational databases (MySQL, PostgreSQL) and non-relational databases (MongoDB, Firebase).

Patronecs
Software Engineer

June 2021 - June 2022

- Experienced in building RestFull APIs using Core PHP.
- Experienced in building dynamic and interactive web applications using HTML, CSS and JQuery.
- Experienced in integrating third-party APIs and developing custom APIs for seamless data exchange and functionality enhancement.
- Experienced in optimization of the performance and ensuring scalability of web applications.
- Participating in agile development processes, including sprint planning, daily stand-ups, and sprint reviews.

PROJECTS

Tori (SAP)

Tori is an AI-driven web application within SAP, tailored for creating marketing scripts. It facilitates collaborative work among multiple user roles, including administrators, hub leads, editors, and SMEs.

- **Backend Development:** Contributed to the backend functionalities using Laravel, ensuring robust data handling and API responsiveness.
- **AWS Deployment:** Managed application deployment and operation on AWS.

Stack of Project: React, Laravel, MySQL, AWS

Role: Backend Developer

OutDone

OutDone leverages a smart gift recommendation system powered by AI, utilizing user inputs to provide highly personalized gift suggestions.

Backend Development: Played a key role in developing the backend with Laravel.

AWS Deployment: Handled the deployment on AWS.

Stack of Project: PHP, Laravel, MySQL, AWS, React

Role: Backend Developer

FWD (Fitness With Dina)

FWD is a dual-language mobile application aimed at enhancing personal fitness journeys. It offers personalized workout and meal plans. It also offers chat communication with trainees.

Full Stack Development: Developed the admin panel using VueJS and implemented backend APIs with Laravel, ensuring seamless data integration and user experience.

App Deployment: Managed deployment processes across AWS, ensuring optimal performance and scalability.

Stack of Project: Laravel, MySQL, AWS, VueJS, Flutter

Role: Full Stack Developer

Britewireless

Britewireless is a comprehensive application designed for businesses offering data and voice plans, SIMs, and routers. It features a dynamic admin panel that supports the management of multiple companies, enabling efficient account management, SIM activation, and customer status monitoring.

Sub Projects Under Britewireless:

- **Teltik:** Developed a customer-oriented template for easy selection and ordering of plans and devices.
- **IOT Portal:** A platform for bulk orders, enhancing the service for business clients and resellers.
- **Datafailover:** Created a flexible ordering system that supports express shipping and multiple service plans, focusing on rapid delivery and customer satisfaction.

Stack of Project: Laravel, MySQL, React, NextJS

Role: Full Stack Developer
